ABOUT ME

A BCA graduate with growing experience in content creation, digital awareness, and data interpretation through project-based learning and job simulations. Familiar with tools like Power BI, Canva, and MS Office, and comfortable working with data-driven insights. I enjoy finding creative solutions, paying close attention to detail, and collaborating with others to achieve shared goals. With a strong sense of time management and adaptability, I'm eager to contribute to meaningful projects in dynamic environments.

PROJECTS

Community Service Project:

- Community Service Project – Identifying Community Needs:
- A community survey helps pinpoint specific needs and challenges, offering valuable data to guide decisions and allocate resources effectively.

AI and ML Based Project:

Type of Presentation – Theoretical Overview of ML-Powered System:

NexGen Bot presents the theoretical foundation and workings of a future chatbot driven by machine learning algorithms.

JOB SIMULATIONS

Bloomberg – Client Engagement Job Simulation | Forage

Identified client needs and proposed solutions to business challenges.

NSW Government – Marketing & Communication Job Simulation | Forage

Planned communications and wrote internal content for government audiences.

Accenture – Data Analytics and Visualization Job Simulation | Forage

Analyzed data, created visual dashboards, and presented insights to clients.
